

Last Updated: 25.01.2021
Product Code: AD0017

AUTOTRANS DB17 FE is a premium, fully synthetic, low viscosity automatic transmission fluid developed to meet the exacting requirements of the latest 9-speed Mercedes-Benz transmissions.

APPLICATION

Designed specifically for the Mercedes-Benz 9G-Tronic 725.011 / NAG 3 transmissions, it is also backwardly compatible to meet the earlier MB 236.16 specification for Mercedes-Benz 9-speed transmissions.

Note: Not suitable for use in older 7 and 5 speed transmissions with specifications MB 236.15, 236.14, 236.12, 236.10 etc.

BENEFITS

- Low viscosity formulation to provide maximum transmission efficiency and enhanced fuel economy.
- Exceptional anti-wear protection and oxidation stability for longer component and fluid life.
- Outstanding thermal stability protects against high-stress conditions and high operating temperatures.
- Exceptional low temperature properties for smoother shifts even in extreme cold environments.
- Excellent lubricity and anti-shudder durability with more stable frictional characteristics.

PERFORMANCE PROFILE

Suitable for use where the following specifications are required;

- MB 236.17
- MB A000 989 59 04
- Not suitable or compatible with previous MB specifications/applications as listed above
- Not recommended for CVT or DCT transmissions

TYPICAL PROPERTIES

Appearance:	Amber
Specific Gravity @ 15.6°C:	0.835
Kinematic Viscosity @ 100°C (cSt):	4.6 (typical)
Pour Point °C:	-50

HEALTH AND SAFETY

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Safety Data Sheet is available on request.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
