

QUENCHING OIL Q22 is a highly refined, low viscosity, low sulphur content general purpose quenching oil.

APPLICATION

QUENCH OIL Q22 is a universal quench oil recommended when quenching direct from cyanide salt furnaces. Can be used for other hardening processes as well as a cyanide quenching.

Use as received. Ensures excellent quenching characteristics, providing good oxidation stability and low volatility.

BENEFITS

- Low viscosity
- Low sulphur content
- Good stability
- Resists thickening up by oxidation

TYPICAL PROPERTIES

	Q22
Typical Kinematic Viscosity @ 40°C (mm ² /s)	21.2
Typical Kinematic Viscosity @ 100°C (mm ² /s)	4.1

HEALTH & SAFETY

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Material Safety Data Sheet is available.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
