

SYNMAX SYNERGY 0w20 is a premium full synthetic, fuel-efficient engine oil primarily designed to meet the stringent performance and fuel economy requirements of many modern vehicles with hybrid drivetrains.

APPLICATION

Formulated primarily to meet the requirements of hybrid-electric, and plug-in hybrid-electric vehicles fitted with petrol engines requiring a low-friction 0w20 engine oil, and especially recommended for use in many of the hybrid models from **Toyota, Lexus, Honda** and **Mitsubishi** where this grade of oil is specified.

In case of doubt, please refer to vehicle handbook to ensure correct oil specification requirement.

BENEFITS

- Designed to provide significant energy saving and lower environmental pollution capabilities.
- Excellent shear stability properties ensure suitability for use over extended drain period.
- Designed to provide significant energy saving and lower environmental pollution capabilities.
- Exceptional low temperature performance to improve cold start properties.
- Enhanced stay-in-grade properties ensure low levels of volatility across the whole service period.

PERFORMANCE PROFILE

Suitable for use where the following specifications are required;

- **API SN-RC**
- **ILSAC GF-5**

TYPICAL PROPERTIES

Kinematic Viscosity @ 100°C:	8.4	Sulphated Ash %:	<0.8
Density @ 15.6°C:	0.844	Flash Point °C:	>200
TBN, mg/KOH/g:	8.0	Pour Point °C:	-40

HEALTH & SAFETY

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Material Safety Data Sheet is available.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
