

Chain Lube Aerosol

An excellent lubricant for medium and heavily loaded chain drives. It is suitable for a wide range of temperatures and contains anti fling compounds and tacky lubricant additives to prevent it being easily thrown off during use. Formulated with PTFE solid lubricant to promote long-lasting performance, and is O Ring Safe.
Operating temperature range -30°C to +180°C, with occasional peak to +200°C

Product code – ARCH500
Pack size – 500ml aerosol in box of 12
