

**CHAIN LUBE SYNTH 280** is a high quality, high temperature chain lubricant based on synthetic esters, and inhibited against oxidation to give a long wet film life at higher temperatures.

## APPLICATION

Designed for the lubrication of conveyor chains and bearings running continuously at high temperatures, up to 280°C, and short periods up to 300°C, on textile stenters, drying machines, bakery ovens and on paint stoving chains.

## BENEFITS

- Long fluid life at high temperatures to provide maximum lubricant economy
- Does not form hard carbon deposits
- Exceptional load and anti-wear properties
- Miscible with most ester-based fluids

## TYPICAL PROPERTIES

Appearance:	Straw-coloured liquid
Viscosity @ 40°C:	135-165 cSt
Temperature Range:	-10 to 280°C (Up to 300°C for short periods)
NOACK weight loss after 1hr @ 250°C:	0.9%
Specific Gravity:	0.98

## HEALTH & SAFETY

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Material Safety Data Sheet is available.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
