

Product Code: IP 0912

Updated: 27.01.2017

DEWATERING FLUID NO.12 is a multipurpose, solvent based rust preventative which leaves a thin protective film on drying.

APPLICATION

Use as received for the protection of all types of ferrous components. Ideal for the dewatering and ongoing short-term protection of components and sheet steel following treatments such as phosphating, acid pickling and other similar chemical processes.

Suitable for application by various methods such as dipping, spraying or manual brushing.

BENEFITS

- Exceptional dewatering properties
- Provides medium term indoor protection up to 3 months
- Easily removed with petroleum spirits

TYPICAL PROPERTIES

Specific Gravity @ 15 ^o C:	0.793
Flash Point ^o C:	38
Indoor protection:	> 3 months
