

SARCHAIN 830 is a high quality, synthetic chain lubricant formulated to provide superior high temperature performance.

APPLICATION

Designed for the lubrication of conveyor chains and bearings running continuously at high temperatures, up to 250°C, on equipment such as chain conveyors, roller conveyors, pallet handling equipment and belt conveyors.

BENEFITS

- Long fluid life at high temperatures to provide maximum lubricant economy
- Low odour formulation even at highest temperatures
- Exceptional load and anti-wear properties
- Provides superior protection against corrosion and oxidation

TYPICAL PROPERTIES

Appearance:	Pale amber liquid
Viscosity @ 40°C:	130-160 cSt
Temperature Range:	-10 to 250°C
Evaporation loss after 5hr @ 180°C:	1.6% w/w
Specific Gravity @ 20°C:	0.98

HEALTH & SAFETY

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Material Safety Data Sheet is available.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
