Product Code: MW0850

SARDRAW 850 is a high-performance heavy duty drawing lubricant for the cold reduction of steel bar / bright bar. The combination of carefully selected additive technology and base oil structure ensures an extreme pressure performance for deformation of ferrous metals under arduous conditions.

APPLICATION

Designed for use on heavy duty to severe applications such cold forging, heavy duty stamping, cold reduction / drawing of ferrous materials.

BENEFITS

- Provides outstanding chlorine free performance
- Good surface finish
- Low odour
- High flash point
- Extended die life
- Cost effective
- Readily removed by solvent degreasing methods

TYPICAL PROPERTIES

Kinematic Viscosity @ 40°C:	850.0 cSt
Appearance:	Pale Brown liquid
Flashpoint:	> 200°C
Boiling Point °C:	> 250°C

HEALTH & SAFETY

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Material Safety Data Sheet is available.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
