

Last Updated: 21.01.2014

Product Code: IP 0388

**SARTEC 20** is a medium viscosity rust preventative, which leaves a thin protective film. Formulated with a blend of corrosion inhibitors and waxes in a hydrocarbon base.

## APPLICATION

Use as received and apply by spray, brush or dipping in a well ventilated area. Leaves a waxy film on drying.

## BENEFITS

- Good dewatering properties
- Provides short term protection of metal components when stored undercover
- Easily removed with hydrocarbon solvents
- Excellent penetration
- Non staining
- Can be used on both ferrous and non-ferrous metals to protect from atmospheric corrosion

## TYPICAL PROPERTIES

Appearance:	Fluid Oil	Specific Gravity @ 15.6°C:	0.8342
Colour:	Amber	Indoor Protection:	3 Months
Flash Point:	60°C	Kinematic Viscosity @ 40°C:	8.4 cSt

## HEALTH & SAFETY

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Material Safety Data Sheet is available.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
